

Fourteen years of service to the community

Chebucto Community Net has provided access to more than 28,000 people, groups and businesses. We were the first Internet Service used by HRM, the Regional Library, the Chronicle Herald and many others. Millions of people access our website each month.

An important part of Chebucto's mission is to see that no person, family or organization is excluded from access to the Internet. Those who can't afford to pay are given free accounts. We believe Chebucto has played an important role in making HRM the second most active Internet-using community in Canada.

I would encourage everyone to consider joining the Chebucto Community Net. It is clearly a way of supporting your community. There is something here for everyone.

Alan Turner
Chair, Chebucto Community Net

Your community is online here!

Chebucto Community Net is a Halifax-based community Internet Service Provider here to help people access the array of services available to them online. We provide free and low-cost access to the Internet with no strings attached.
